Suffering from Reflux or Heartburn?

The Solution may be Incisionless Surgery

TIF is a surgical procedure performed through the mouth, without incisions, to reconstruct the body's natural barrier to reflux. **No more Pain. No more Pills. No Scars!**

A recent study showed 93% of patients remained free of heartburn symptoms and 79% were off daily PPIs at two years.

Please join us for a luncheon on August 26, 2010 at 12:00pm to hear Dr. McCalla discuss his new procedure. Location: RMH Conference Rooms. Please RSVP: (785) 229-8458.
